

May the Scent of the Oils Bring You a New World

October, 2005

Dear Friends,

I am sending this newsletter to anyone who is interested in building their business. If there is any way I can help, please contact me at (269) 673-4849, or email me at: mhardy@allegan.net. I feel that *Young Living* has the best products available in any MLM program. This newsletter's article is "Guarding Against the Bird Flu and Other Diseases Hyped in Our News Media." Using Young Living Essential oils can help humanity attain a higher level of consciousness when used properly. This article focuses on using the essential oil products to protect yourselves from flu and other environmental hazards.

Beginning in April, 2005, Young Living launched its New Marketing Program. On March 17, I attended a leadership meeting to learn about the new program. To earn an override, one should develop two legs of \$5000.00 each. I would be happy to help you move people that have not ordered in the last six months. To make big money in Young Living, you need to earn these overrides.

This new marketing program is based on signing up new people and getting them on autoship so that they buy product monthly, such as the ART skin care kit or the Ningxia Red Juice. Did you know that if you sign someone up that you get 25% of their first order back as income to you? Starting September 16, the company created a contest that will go until March 15, 2006. This contest is based on this same plan. Please see the website for further details on this exciting contest.

The purpose of the new program is so that it can be more easily explained, and to help beginners make more money. If you desire a further understanding of this new marketing program, please look on Young Living's website (www.youngliving.com) under Virtual Office, or, contact me, and I will send you three sheets of explanation and go over it with you on the telephone. This plan is not so different than the old plan, however, it has some tremendous bonuses for the beginners. The first bonus is the preferred customer bonus. Young Living is launching this marketing program on three products: 1. The Essential Oil Kits: - Thieves Kit 1 and 2, the Golden Touch 1 Kit, and The Essential 7 Kit; 2. Berry Young Juice, and 3. The ART skin care Kit. All of these are very easy to sell. If you enroll 6 personally sponsored preferred customers (a preferred customer is a customer who enrolls in a monthly \$50 autoship order), you will qualify for this \$100 bonus, plus you will be paid on the PV from their orders. The second bonus is the Distributor TEAM Performance Bonus, which is designed to correctly build your business so that you can advance into the Star to Crown Diamond Program. Here is where you make your money.

The first product that we wish to promote is the Essential Oil Kits (Thieves, Golden Touch and Essential 7). By using the power of the oils, we can reestablish the proper spin within the blood so that we can become the Christed beings that God intended. We as distributors must understand this knowledge. Aromatherapy is the only way to reestablish the proper frequency within the blood.

The second product we want to promote is the Ningxia Red Berry Juice. This product has the polysachirides that will balance the immune system to protect you from environmental toxins. It also promotes healthy urinary tract functions. Personal example: My husband Dean, like many elderly gentlemen, has a prostate problem. By drinking the juice, his urinary tract function has greatly improved. The juice contains pomegranate, which the news media has heralded as the only known product to shrink the prostate gland. Since we heard this on the news, Dean has been drinking 2 ounces of the Ningxia Red juice daily. We are thrilled with the improvement!

The third product is the ART skin care Kit, Young Living's age refining technology. Enhance your natural ability to replenish skin and reduce fine lines and wrinkles by increasing the elasticity and thickness of the skin- revealing a fresher, healthier and more radiant complexion. Age Refining Technology is the art and science of skin care.

The purpose of the new marketing program is to sign new people up and start them on auto ship so that they buy on a monthly basis. When you do this, you can build a business that will support you in any manner you choose. If you sign new people up using this model, you can build up to Silver Star status that pays override bonuses earning over \$1,000.00 per month in a hurry.

It is time that our distributors benefit by introducing new clients to the magic of the oils by first introducing them to these 3 marvelous products.

Guarding Against the Bird Flu and Other Diseases Hyped in Our News Media

Rev. Mary Hardy, Ph.D.

Our media seems to think that we need to guard against a flu epidemic. In the early 1900s, the flu hit and killed thousands of people. Whole communities were wiped out. Our news media is saying that that flu is similar to the bird flu that is currently being propagated in Asia by the unhealthy conditions of the chicken farms. The news media is saying that the epidemic of the early 1900s is similar to the bird flu of modern times. Mladen Lebar, the head of the poultry producers' association in Croatia, blamed the hype. "The media have played a significant role by blowing the whole thing out of proportion and having many reports that do not correspond with expert knowledge on the issue," he said, adding that sales in Croatia had dropped, but only slightly.

In the early 1900s there were two types of physicians. Those who were still practicing Homeopathy, and then you had the regular MD practitioners. According to reports on the internet, the Homeopathic practitioners only lost 2% of their patients, while the regular MDs lost over 75% of their's. The big killer in the 1900 flu was the use of aspirin. The bird flu, like that flu, needs a high temperature to cook out the infection. The use of aspirin reduces the fever and covers up the symptoms while it allows the disease to flourish.

Some people are saying it would be wise to wear a mask for protection. In the 1900 flu epidemic, many wore masks thinking they were safe. They were mistaken. The only way to use a mask successfully to protect against the flu and other air born hazards, is to drop the essential oils of RC, Thieves, Christmas Spirit, Lemon, or other oils like Longevity onto the mask before wearing it, and continuing to replenish the oil every hour or so as needed.

Young Living has several products that can protect you from environmental hazards. Gary Young has put together product called *Longevity*, which can be purchased in capsule form, or as an essential oil blend. *Longevity* is well known for its powerful antioxidants and support of DNA.

Longevity also repairs and protects cellular integrity. It contains the therapeutic-grade essential oils of thyme, orange, clove, and lecithin. Another protection product I would recommend is *ImmuPro*. It is a great tasting chewable supplement packed with immune-supporting polysaccharides including beta glucan. This advanced formula is the ultimate in immune system support. It is the only immune supplement that includes the benefits of wolfberry polysaccharides. *ImmuPro* contains 185 mg of wolfberry polysaccharide, 16 mg of Zinc, 68 mcg of Selenium and 0.4 mg of copper per tablet.

And to REALLY support the immune system, you should take *Ningxia Red Juice* on a daily basis. It is packed full of unique protein-polysaccharides that help sustain proper immune function,

The two Young Living Kits I would recommend are The *Golden Touch 1 Kit*, and either *Thieves Kit*.

THE GOLDEN TOUCH 1 KIT

Young Living's

Natural Cold/Flu/Allergy Survival Kit

This kit contains 7 oils: Endo-Flex, Di-Tone, Melrose, Thieves, Juva-Flex, Raven, and RC. This kit is a must if you wish to rid the body of the mono-toxins that cause the imbalance that creates an unhealthy environment that allows the flu, etc. to thrive.

ENDO-FLEX has been researched for its affects on the endocrine system, including the thyroid and adrenal glands.

It may help overall vitality and improve and balance metabolism. Endoflex works on increasing the function in the endocrine system which will help combat fatigue. Apply to the vitaflex points on the feet and abdomen.

DI-TONE is blended specifically with oils noted for their effects on the digestive system. It has been studied for its effects against parasites as well as for its enzyme support capabilities. Di-Tone can be soothing for cramps, colic, bloating and indigestion. It is helpful for any digestive problem. Apply Di-Tone to the Vitaflex points of the colon on the bottoms of your feet AND to the outsides of your shins, another colon vitaflex point. If you get food poisoning, try a few drops every couple of minutes. In the case of parasites, rub it on the stomach and the back, and breathe it deeply into the lungs.

MELROSE includes two medicinal-grade melaleuca oils that are renowned for their antiseptic properties. The blend can be used to cleanse cuts, scrapes, rashes, insect bites and stressed tissue. Apply directly over area of concern. It helps alleviate the sting of rug burn and helps protect the area from infection.. It can also be used in deep wounds to help pull the tissue together.

THIEVES was tested at Weber State University to have a 99.96% kill rate against airborne bacteria. Can be diffused, added to water as a mouthwash, or used as a gargle for sore throat. Put a drop or two in water and drink to combat parasites, and the flu virus. This product is so powerful, that it has its own new kit, which we will discuss later.

JUVA-FLEX is a combination of oils that have been studied for their effect on the liver and digestion. Juva-Flex oil has also been known to help people to overcome tobacco and alcohol additions. Apply to vita flex pint for the liver.

RAVEN is an antiseptic blend of essential oils that can be soothing and purifying to the respiratory tract, including the lungs, bronchioles, and throat. Diffuse, apply on vita flex points of feet or directly on location.

RC is a blend of four eucalyptus oils that has been studied for its effects on supporting and strengthening the respiratory system. RC can be used in tight situations when you wish to prevent bacteria from entering the nose. It can be applied directly under the nose to protect you from airborne bacteria and also from emissions from gas engines, motors, etc. Diffuse, apply to vita flex points on feet or directly over area of concern.

Our latest products are the new and exciting **Thieves® Kits!** All Thieves® products contain Young Living's Thieves® essential oil blend. This blend was tested at Weber State University, Ogden, Utah, and found to have up to a 99.96% rate against airborne bacteria.

The Thieves® Kit includes Thieves® oil (15 ml), the all-natural Thieves® Cleaner, the versatile Thieves® Spray 3-pack, and the handy Thieves® Wipes. It also includes the 30-count Thieves® Lozenges absolutely FREE! Product #3154

Thieves® Kit II is the supreme wellness kit. It includes a 5 ml bottle of the renowned Thieves® essential oil blend, the powerful new Thieves® hard lozenges, Thieves® Spray, and one bar of the hand-poured Thieves® bar soap made with the finest ingredients. This new Thieves® Kit

also contains the ultimate in oral health: Thieves® Dentarome Ultra™ Toothpaste and Thieves® Fresh Essence Plus™ Mouthwash. Safeguard your family's health by adding this kit to your order. Product #3173

Thieves products are a must during flu season. With these new products, you can clean surfaces, wash your body with Thieves soap, use Thieves toothpaste to brush your teeth, and protect against sore throat with Thieves Lozenges. Thieves spray is a must when you encounter germ infested areas, perhaps at a motel, an office, or a public restroom. Thieves spray will protect you against bacteria lurking on surfaces, in vent systems and bedding covers, and toilet seats

To guard against colds and flu, apply Thieves oil to your feet at bedtime. An especially powerful time to use Thieves oil (or any essential oil) is to apply before showering or bathing, in fact, the moisture will help drive the oils in. When faced with a severe lung infection, use warm, moist compresses (a wrung out cloth) on the chest to enhance the benefit of the oils. Layer 2 to 3 drops of Thieves, Melrose, RC and Raven on the chest and cover with a warm damp towel. When the towel cools, repeat several times. If you have someone to help you, have them apply the oils to your back - the lungs are closer to the back than the front. RC and Raven are very powerful when it comes to lung tissue. Breathe them in deeply.

Use these Young Living products to help guard against the flu and other toxins in the environment.
